Does alpha gas have a LNG carrier?

Alpha Gas took delivery of the second LNG carrier in this batch, Energy Endurance, in January this year. Prior to these deliveries, Alpha Gas welcomed the 174,300-cbm Energy Intelligence into its fleet in June 2021.

What is alpha gas' new LNG carrier energy fidelity?

With a cargo capacity of 174,000 cbm, the LNG carrier Energy Fidelity is the newest addition to Alpha Gas' in-house commercial and technical management. According to the company, Energy Fidelity is the first LNG carrier propelled with XDF engines to join its fleet from a series of three to be delivered by HSHI within 2023-2024.

Did Alpha gas deliver energy Fortitude?

Alpha Gas confirmed the delivery of the vessel in a social media post later on Tuesday. "Energy Fortitude was delivered from the yard straight into her first employment (long-term charter) with a world-class Far East based charterer," the company said. HSHI launched this LNG carrier in July last year.

What does alpha gas do?

Alpha Gas provides technical management including dry docking and new building supervision, along with operational, crewing, vessel accounting and procurement services. Alpha Gas is currently managing eight LNG carriers. Alpha Gas is ISO 9001, ISO 14001, ISO 45001 & ISO 50001 certified and is a member of SIGTTO.

What are long-term natural gas storage projections?

Long-Term Natural Gas Storage Projections Experimental long-term projection data based on extended temperature trends and current supply/demand balance. Includes withdrawal season-ending projections & weekly storage forecasts for the next 8 months. Click above for more long-term projection data

What are Alfa Laval heat exchangers?

Alfa Laval heat exchangers are core components of efficient and low-cost energy storage systems, especially for grid-scale thermal and mechanical solutions. They handle the cyclic nature of these applications, working well with different temperatures, pressures, and fluids.
