

The Storage Database is the base of the Storage Map. It shows the operational data such as working gas volume, injection and withdrawal capacities of storage facilities as well as the under construction and planned storage sites. The ...

A (more or less) simple script that reads data from the AGSI/GIE (Aggregated Gas Storage Inventory) API and stores it in an InfluxDB for later use with Grafana or similar. The AGSI/GIE website provides gas filling levels for various countries in Europe. - LordOfTheSnow/agsi

GIE has worked closely with ACER to develop the fundamental data reporting schemes, which are mandatory to use by Storage system operators, LNG System Operators and market participants. In order to further facilitate this, Gas Infrastructure Europe (GIE) has registered as RRM (Registered Reporting Mechanism) with ARIS, the ACER REMIT ...
