Why should you visit the Feda hydroelectric power station in Andorra?

dpd@feda.ad privacy policy
Housed in the FEDA hydroelectric power station, which was inaugurated in 1934, the museum illustrates the historic development of electricity generation in Andorra. At it, visitors can discover and experiment with the laws of electricity in entertaining educational workshops.

Why is a power station important in Andorra?

This power station entered into service in 1934 and even today remains the main source of electricity production in Andorra. The power station building is considered to form part of Andorran cultural heritage due to its granite architecture and to the fact that it symbolises the modernisation of the country.

What is the Museum of electricity doing in Andorra?

The Museum of Electricity regularly hosts exhibitions. The show that is open at present, entitled "Paths to Progress", is a photographic exhibition on the construction of roads in Andorra.

The Power House is located at the foot of Ashley Street on the Mississippi River. Constructed in 1902 by engineer/architect Charles Ledlic, it was the first large electrical power plant to be erected by the Union Electric Company. The building became a City Landmark in 1971.

People who searched for jobs in Andorra also searched for power plant engineer, control room operator, boiler operator, equipment operator, water treatment operator, chemical plant operator. If you're getting few results, try a more general search term. If you're getting irrelevant result, try a more narrow and specific term.
