Can natural energy fuel Antarctica?

Harnessing natural energies can fuel our Antarctic stations and reduce our dependence on fossil fuels. Moon over the Mawson wind turbine. Photo: Warren Arnold Transporting fuel and oil to Antarctica is a costly and sometimes risky exercise.

What is a hybrid energy system in Antarctica?

Many national Antarctic programmes (NAPs) have adopted hybrid systems combining fossil fuels and renewable energy sources, with a preference for solar or wind depending on the specific location of the research station and previous experiences with certain technologies.

Is supplying fuel to Antarctica dangerous?

However, supplying fuels to Antarctica is not only expensive but also dangerous, as the risk of oil spills and fires (ASOC 2009) presents a safety hazard with potential long-term environmental consequences.
