I never drilled holes in my mice, I never went down to 50g, never annoyed my housemates with ceramic or glass pads, never put ceramic or glass mouse feet on my mice. For how much money and time is spent on this stuff, I feel like it ultimately doesn't make that huge of a difference no matter how much a buyer tries to convince themselves or others that it was worth it.

and it very well might be. there are plenty of players that play val at a very high level who use glass pads. it's a matter of getting used to it. but cloth pads might get you closer to that precision target faster. easier to control means easier on your mouse control. developing better mouse control is going to be the main thing with getting used to any pad

Are glass mouse pads and photovoltaic panels useful

It's awesome if there isn't a single spec of dust in the pad or PTFE feet. I tried ceramic feet and glass feet on it, you just can't use them even for 5 seconds, the scratching will torture your ears and feels very uncomfortable. Only PTFE will work. If you want a truly buttery feeling - try ceramic feet on a Sphex V3 on top of a cloth pad.
