

A key research question to address is how is it possible for Australia to move toward net zero producing energy only by solar and wind, compensating for the large seasonal ...

Abstract Wind and solar energy production are plagued, in addition to short-term variability, by significant seasonal variability. The aim of this work is to show the variability of ...

As at 2018 when the ACOLA report was completed, energy storage was developing in a variety of forms, including batteries, thermal, hydrogen and pumped storage. The then most cost ...
