How will aspire and rise help the Maldives' energy transition?

World Bank-financed projects ASPIRE and ARISE support the Maldives' energy transition by installing more than 53.5 megawatts of solar capacity and 50-megawatt hours of battery storage. This will reduce Maldives' annual import bill by about \$30 million, with a project lifetime saving of \$756 million over 25 years.

What are the challenges facing solar projects in Maldives?

Challenges facing such projects include integrating solar with existing power sources on the grid, off-taker risk, weak procurement, and planning capacity. The objective of the ASPIRE project is to increase photo voltaic (PV) generation in Maldives through private-sector investment. Approved in 2020, the ARISE Project scaled up this process.

Should investors invest in sustainable solar projects in the Maldives?

In 2014, the first 1.5 MW solar project under ASPIRE only had four investors bids, and resulted in a high power purchase price (PPA) of 21 US cents per unit of electricity, indicating a lack of interest from investors in investing in sustainable projects in the Maldives.

How much does a solar project cost in Maldives?

In 2022, 63 investor expressed interest in the third 11 MW solar project in the remote islands of Maldives, and a record low price of 9.8 US cents was received. This is one of the lowest tariffs for any small island developing state (SIDS).

Why is the Maldives economy vulnerable to external shocks?

However, the Maldives' dependence on tourism and fossil fuel imports makes its economy particularly vulnerable to external shocks. Already, in 2020, the country's real GDP contracted by at least 13 percent, 18.5 percentage points lower than the pre-COVID-19 baseline.

Is the Maldives a sustainable investment destination?

This journey, which started in 2014, is now seeing unprecedented interest from international investors and helping establish the Maldives as an investment destination for sustainable projects.

He also emphasised that investing in renewable energy in the Maldives is a profitable business opportunity. The President highlighted that Maldives' renewable energy capacity increased from 53 to 68 megawatts since COP28. He detailed plans to reach net-zero emissions by 2030 with investments in solar, wind, and other renewables, while also ...
