

# Bouvet Island powerstation haus

In 1971, Norway declared the island a protected nature reserve. Today, there is virtually no sign of human activity at Bouvet, with the exception of a single weather station located at Nyrd&#248;ysa. This is the most common landing point on the island created by a rockslide in the 1950s. Wildlife of Bouvet Island

Position of Bouvet Island compared to Antarctica (left) (TUBS, Wikimedia Commons, CC BY-SA 3.0) and Norway (right) (TUBS, Wikimedia Commons, CC BY-SA 3.0).History. The remote island was discovered by French sailor and explorer Jean-Baptiste Charles Bouvet de Lozier on January 1, 1739.

Bouvet Island is a remote, uninhabited island in the South Atlantic and is considered the most isolated island in the world. It is a dependent territory of Norway and covers an area of around 49 square kilometers. This land mass is just over 6 times the size of the island of Wangerooge. The total length of the coastline is 30 km.

02/10/2023. The 3Y0J team has arrived and begun operations on Bouvet Island.The conditions have been difficult and the team is not yet operating at full capacity. The 3Y0J Media Officer and East Coast Pilot, Steve Hass, N2AJ, wrote on Facebook that, as of Wednesday, February 8, 2023, the team has only enough power to operate two radios simultaneously.
