

Bulgaria soft sun 100 kw

What is SoftSun light?

NATURAL SOFT SOURCE- SoftSun lights' unique large linear bulb and reflector design result in a light source that begins as a soft natural light without the addition of diffusions to achieve the desired soft effect. There is no need to back the light off from its subject.

What is a SoftSun 100K linear light?

SoftSun 100K Linear lights are the ideal daylight source for lighting large areas for Feature Film, Television Series and Live Events. They have become an increasingly popular instrument of choice for lighting Large Sporting Events in Arenas and Stadiums.

Are SoftSun lights dimmable?

They achieve maximum power and proper color temperature the moment they are turned on. FULLY DIMMABLE- SoftSun lights are the only daylight color temperature light source that can be dimmed throughout 97% of its range with minimal shift in color temperature (about 100 Kelvin throughout).

Why is SoftSun so popular?

They have also become the light of choice when shooting high speed photography since they provide flicker free daylight up to 10,000 FPS. The reasons for SoftSun's popularity can be attributed to the many advantages they provide compared to HMI's or other HID fixtures:

precise power control from 5% to 100%; frame for fixing the filters included; cherrypicker mount in the set; DMX control option onboard; HANDLING INFO. the crew of min three sparks for one unit; power genny. 400 kVa unit weight with accessories: 210kg; power lock cables weight 3kg per meter (three lines Power Lock min. 75mm;)

100 kW SoftSun. (Courtesy Luminys Corp.) All the larger SoftSun units have Cam-Lok tails. The 50k flicker-free ballast requires a three-phase power 208-240 V AC at 220 A per leg (three phase wires plus ground), 50/60 Hz. So be prepared with 4/0 cable to power this light. Luminys also makes a 50/100 kW ballast that can power either light.

In this paper, we presented KW-Sun--the online catalog of solar flares registered by the Konus-Wind experiment in hard X-ray and soft gamma-ray ranges during more than two full solar cycles. The database contains light curves with high (down to 16 ms) time resolution and multichannel spectra in the wide-energy range (~20 keV-15 MeV) for ...
