The calculation of 2350kWh more energy is based on Anker SOLIX X1's 15kWh batteries compared to a traditional home battery over 10 years. X1 must contain at least three battery modules to reach 100% power at 55°C. 15% more energy at -20°C is calculated using a comparison to Anker SOLIX X1 without a BMS installed.

The financial and environmental benefits. The Anker Solix Solarbank 2 Pro is not just an environmentally friendly choice; it's also a smart financial investment. Given the updated average electricity price of EUR0.26/kWh in many parts of southern Europe, the system can save you approximately EUR964 per year.
