What is solar energy in Chile?

Solar energy is heat and radiant light from the Sun that can be harnessed with technologies such as solar power (used to generate electricity) and solar thermal energy (used for applications such as water heating). The Chile solar energy market is segmented by deployment and type.

Will increasing solar energy demand boost solar energy capacity in Chile?

The increasing solar energy demand will likely boost the solar energy capacity across the country over the forecast period. The Chile solar energy market is fragmented. Some key players in this market (in no particular order) include Acciona, S.A., JinkoSolar Holding Co., Ltd., Trina Solar Limited, Enel Green Power S.p.A., and First Solar, Inc.

How are private investments influencing the solar market in Chile?

Furthermore, private investments are also steering the market in the country. For example, in 2023, Enel Green Power Chile, a subsidiary of Enel Chile, commenced construction of its new El Manzano solar power park in Tiltil, which will be the company's first large-scale photovoltaic solar power plant in the Metropolitan Region.

How much does a solar power plant cost in Chile?

Because of its good solar resource several international companies have bid record low prices for solar thermal power plants in Chile, including the Copiapó Solar Project bid at \$63/MWh by Solar Reserve in 2017. If realized this would have been the lowest ever price for a CSP project in the world.

Which country has the most solar power in the world?

In October 2015 Chile's Ministry of Energy announced its "Roadmap to 2050: A Sustainable and Inclusive Strategy", which planned for 19% of the country's electricity to be from solar energy, 23% wind power, and 29% hydroelectric power. Northern Chile has the highest solar incidence in the world.

How much solar power will Chile have in 2022?

Due to the government's favorable policy, the solar power sector in the country grew from almost non-existent in 2012 to over 6.2 GW by the end of 2022. In 2022, Colbún SA, the Chile-based investor, submitted an environmental assessment for a 422 MW solar PV plus storage project it plans to build in Chile.

Chile has the world's best solar resource for CSP but has yet to fully leverage this global advantage. Participants in the study suggested that once the long-troubled Atacama 1 (Cerro Dominador) CSP project resolved its financial and worker problems that resulted in a two-year hiatus, Chilean authorities might be more amenable to additional ...

The Chile Solar Energy Market is expected to reach 8.40 gigawatt in 2024 and grow at a CAGR of 20.80% to reach 21.61 gigawatt by 2029. Acciona, S.A, JinkoSolar Holding Co., Ltd, Trina Solar Limited, Enel Green
