

Reference [16] proposed a convolutional neural network (CNN) feature matrix constructed from sound and vibration signals, which reduced the adverse impact of large data fluctuations during ...

Aiming at the problem that some traditional high voltage circuit breaker fault diagnosis methods were over-dependent on subjective experience, the accuracy was not very high and the ...

In order to distinguish the fault of the energy storage mechanism of circuit breaker accurately, it is necessary to analyze and compare the sound and vibration signals of the mechanism at the ...

# Circuit breaker energy storage original sound
