

As the country increasingly adopts renewable energy, international companies are lining up to exploit its natural resources, including by placing industrial-sized turbines on windswept Aegean islands and mainland mountain ridges. For firms behind the proliferation of solar plants, Greece's plentiful sun can be harnessed year round.

How you tell your cleantech and energy story is vital to the role you will play in the future economy. We can help. We hold a deep understanding of the nuances and complexities of the technology, policies, and market expectation of energy and clean technologies.

As part of the European Union, Greece has been working diligently to meet European Union-wide renewable energy target. For Greece, this means increasing use of renewable energy by 18 percent of 2005 levels by the year 2020. Hydro power has often been seen as the most prominent source of renewable energy being used in the country; however, ...

Navigating Greece's Energy Landscape: Exploring the delicate balance between supply and demand, issues like cuts and negative billing emerge as hurdles, calling for a forward-looking approach.

The CleanTech Energy team consists of veteran developers with over 900MW of projects developed. Clean Technology Commercialization . The team has deep experience in commercializing clean technology and financing. ... The team has over 20 years experience in clean technology product development. Infrastructure M& A, Finance and Asset Management ...

3 ???· The PowerTitan 2.0's deployment in Greece will further enhance grid stability and contribute to the nation's energy transition efforts. As BESS becomes a crucial part of the ...

Cleantech Insights, Energy & Power, Renewable Energy Sources Floating Offshore Wind - The Race to Scale. In September 2021 experienced offshore wind developer Ocean Winds (950 MW Moray East) and Aker (offshore construction and services) submitted a bid to ScotWind for 6,000 MW using floating wind turbines. France announced a tender, May ...

?? Greece & Hydrogen: Regulations Key to Unlocking Green Potential Hydrogen offers a clean energy future for Greece, but a key hurdle exists: the lack of...

Zainab Gilani, Research Analyst at Cleantech group, talks about how the need for long-duration energy storage (LDES) for flexibility and grid stability is rapidly increasing. Cleantech Group is exploring some of the most ...

Greece, with its extensive 13,676 km coastline and 40% coastal population, holds significant potential for wave energy generation. Though the average wave energy density is 2.5 kW/m, the theoretical annual potential reaches 299 TWh, five times the country's current electricity consumption (56.89 TWh in 2016). While challenges exist, Greece actively explores ...

Navigating Greece's Energy Landscape: Exploring the delicate balance between supply and demand, issues like cuts and negative billing emerge as hurdles, calling for a forward-looking approach. The... Cleantech Geek - Navigating Greece's Energy Landscape:...

Greece has more than doubled its output from renewables since 2014. It needs to invest about 30 billion euros to boost green capacity, expand grids and install energy storage units to achieve its target for 44% of energy consumption to come from green energy by 2030 from 22% in 2021, according to a draft plan for climate and energy. Read More

In february CleanTech Region with Lars Ling and Anders Nyquist presented at the conference about energy efficiency in buildings and houses in Athens Greece. The conference was a huge succes with over 30 new prospects and requests. More are following. At the photo Mr Anders Nyquist with Dimitris from Swedish Trade Council office in Athens. They...

Zainab Gilani, Research Analyst at Cleantech group, talks about how the need for long-duration energy storage (LDES) for flexibility and grid stability is rapidly increasing. Cleantech Group is exploring some of the most interesting innovation in this field. Zainab will share the key trends and challenges in this sector.

Singapore, 13 December 2021: Cleantech Solar, a leading provider of renewable energy solutions to corporations in India and Southeast Asia, announced today that a consortium of Keppel Corporation Limited ("Keppel"), Keppel Asia Infrastructure Fund LP ("KAIF") and a co-investor of KAIF, through Cloud Alpha Pte Ltd, is acquiring a 51% equity interest in Cleantech Renewable ...

Cleantech Geek. As Managing Partner of Wattcrop (<https://>) I had the pleasure to participate in a panel of experts from companies and organisations representing the energy sector. The panel's topic was the challenges and prospects in the photovoltaic sector in Greece. We took the opportunity to present Wattcrop's ...

CleanTech is an independent power producer and renewable electricity developer in the Philippines. We are committed to transforming energy production and supply in the country by providing clean and affordable energy to ensure the preservation of the environment.

Cleantech Geek. Be Bold. Make the Change. Have a meaningful Impact. My latest online discussion (in Greek, unfortunately for my non-greek speaking visitors) with Mr. Pougardis on e-ptolemeos.gr - one of the largest news agencies in Western Macedonia. The discussion revolves around renewable energy in Greece; More specifically we talk about ...
