Could solar power be the future of energy in Congo?

Congo is one of the top five oil producers in Sub-Saharan Africa. But despite its rich energy resources, the electrification rate is low, especially in rural areas, mainly because of a lack of electricity infrastructure. But solar power could be the future as it is also said to be cheaper for households.

Why did the DRC invest in a 100 MWp solar project?

The Lualaba province, where the city is located, has large deposits of copper, cobalt, uranium and radium. According to the IFC, the investment in the 100 MWp solar project underscores "its commitment to innovative early-stage energy projects and the DRC government's efforts to increase and diversify its power generation.

How will Finland and IFC finance a solar project?

The international financial institution will provide an additional \$900,000 through the Finland-IFC Joint Climate Finance Program. All the partners in this solar project will launch a special purpose company based in Kolwezi, in the southeast of the DRC. The company will build the future solar photovoltaic plant with a capacity of 100 MWp.
