

Croatia marmon industrial energy and infrastructure

Are enclosures and fire-rated chases really saving you money on your commercial building's fire protection? Discover for yourself the short and long-term cost-effectiveness of using traditional fire protection methods versus fire-rated cables.

In the demanding world of mining, reliable communications and control are crucial for operational efficiency, safety, and productivity. Our mining communication, control, and power cables are engineered to provide robust and dependable connectivity in the harshest mining environments, ensuring that your operations run smoothly and safely.

Cables used in the downstream processing of oil and gas include activities such as refining, petrochemical production, and distribution. These cables are typically used in environments that are harsh and demanding, and as such, they must meet certain requirements in order to function effectively and safely.

The Marmon Industrial Energy & Infrastructure Group, a division of Marmon Electrical, offers a comprehensive suite of unique and innovative products and solutions that keep the world ...

February 23-26, 2024 - Denver, CO. The Expo at MINECHANGE features some of the biggest names in the mining industry today. Cables must be resistant to industrial chemicals, oil, and acid. They must also be resistant to mud contaminated by petroleum hydrocarbons and other chemical components. Finally, they should be resistant to fire and, in some cases, possess low-smoke properties.

always known Marmon Industrial Energy & Infrastructure for its quality, customer service, and expertise in the manufacture of instrumentation cables. Dekoron Wire & Cable joins sister Company RSCC Wire & Cable as part of the Marmon Specialty Wire Group. 2015 Dekoron Wire & Cable, along with RSCC, Dekoron Unitherm, Comtran Corp

Exane® is synonymous in the upstream oil and gas market for its quality, reliability, and longevity in the field. In the early 80's Exane quickly became a household name as a high-performing cable solution that overcame arduous drilling conditions, out-performing and out-lasting cables previously used by the industry.

Surface and underground mining operations require cable solutions that can withstand the toughest conditions. Elements such as flexing, vibration, and impact found in harsh mining environments can make or break even the most rugged mining machinery.

Marmon Industrial Energy & Infrastructure is a company that produces electronic wire and cable products. It offers tubing and data cables for communication, fire safety, instrument, and nuclear products. The company caters to the industrial, energy, and infrastructure sectors. Type Subsidiary Status

Marmon IEI strives to achieve deep sustainability throughout our supply chains and ensure our customers have access to the data they need to reduce risk in their operations. We are committed to ongoing due diligence in our activities and upholding the highest standard of transparency and compliance with regulatory requirements in our operations.

Instrumentation cables are used to transmit electrical signals or power to instruments or control devices in an industrial or commercial setting.
