Cuba puso en marcha su primera central de energía solar fotovoltaica con 14.100 paneles de fabricación nacional y del cual se espera cosechar energía como para aliviar su abultada factura de petróleo, cada vez más caro y esquivo. De un plumazo, la Isla duplicó su capacidad fotovoltaica.

Unlike other countries where people make a living from selling clean energy, in Cuba those who install solar panels essentially seek energy self-sufficiency, that is, to have electric power even during blackouts.
