

# Does the country develop energy storage and have energy storage business

How is energy storage developing in China?

However, China's energy storage is developing rapidly. The government requires that some new units must be equipped with energy storage systems. The concept of shared energy storage has been applied in China, which effectively promotes the development of energy storage. 4.3. Explore new models of energy storage development

Can energy storage be commercialized?

Energy storage has entered the preliminary commercialization stage from the demonstration project stage in China. Therefore, to realize the large-scale commercialization of energy storage, it is necessary to analyze the business model of energy storage.

Why is energy storage important in North China?

North China has abundant wind power resources. Energy storage assists wind farms with the storage and transportation of electrical energy. Energy storage projects in North China are currently the most in China. Due to the geographical environment, the power grid in Northwest China cannot supply power to all regions.

Is China a good country for energy storage?

China's civil electricity price is cheap and the power quality is high, so China's user-side energy storage is concentrated in commercial use. The scale of energy storage cells in China is higher than that in Germany. Germany's energy storage is directly traded with residents, and China's user-side energy storage is traded with companies.

How to make the energy storage industry more standardized?

In order to make the energy storage industry more standardized, the business model of energy storage should be studied in depth. 3. Development of various energy storage business models in China

Why are energy storage technologies important?

They are also strategically important for international competition. KPMG China and the Electric Transportation & Energy Storage Association of the China Electricity Council ('CEC') released the New Energy Storage Technologies Empower Energy Transition report at the 2023 China International Energy Storage Conference.
