

# Dubai s new energy storage policy adjustment

Why is energy storage important in Dubai?

"We follow the vision and directives of His Highness Sheikh Mohammed bin Rashid Al Maktoum, Vice President and Prime Minister of the UAE and Ruler of Dubai, to ensure energy security and sustainability. Energy storage is a vital aspect in ensuring energy sustainability and increasing the reliance on clean and renewable energy sources.

Why is the UAE a leader in energy storage technology?

The UAE is committed to pioneering advancements in energy storage technologies, particularly focusing on batteries, vanadium redox flow batteries, and electrochemical energy storage solutions, to drive a sustainable future .

Why is the UAE interested in decentralized and community-level energy storage?

In addition to grid-scale projects, the UAE has shown interest in decentralized and community-level energy storage solutions. By empowering communities to store and manage their renewable energy locally, the country aims to upgrade its energy resilience and promote sustainability at a grassroots level.

What will the UAE's energy sector look like in the future?

The UAE's energy sector is on a transformative path, with several key trends and takeaways likely to shape its future: (i) Renewable Energy Integration, (ii) Advancements in Energy Storage, (iii) Smart Grid Technologies, (iv) Green Hydrogen Production, (v) Policy and Regulatory Support, (vi) Sustainable Infrastructure Development.

What is Dubai Electricity & Water Authority (DEWA)?

Dubai Electricity and Water Authority (DEWA) is one of the leading organisations in adopting the latest and best technologies for storing clean energy, and several of its energy storage projects are among the largest regionally and globally.

How can the UAE transition to a low-carbon economy?

Examines innovative technologies and storage methods to enhance grid stability and transition to a low-carbon economy in UAE. The Sustainable Development Goals (SDG) of the United Nations emphasize the need for renewable, low-cost, and environmentally friendly energy.

This policy shift feels like removing training wheels from a bicycle. While mandatory storage helped China achieve 73.76 GW of new energy storage installations by 2024 (crushing the ...
