For further details on how we treat your personal data, please see our privacy notice Thank you for signing up for the EIC newsletter.

How does energy cost affect competitiveness in Türkiye?

The fact that the industry sector in Türkiye has an energy-intensive structure compared to many equivalent countries causes energy costs to be a component that directly affects competitiveness, especially in facilities in the manufacturing industry.

What is the National Energy Plan of Türkiye?

1.2.2. National Energy Plan of Türkiye Türkiye's National Energy Plan, which was created based on Türkiye's 2053 net zero emission goal and shared with the public on January 19, 2023, includes estimates and projections for the period until 2035.

How will energy performance standards be determined in Türkiye?

Minimum energy performance standards will be designated for prioritized machinery and equipment by working with industry associations. Priority existing best technologies and practices for Türkiye, especially industrial symbiosis and waste recovery, will be designated and sectoral best practice guides will be published.

Why does Türkiye have a high energy consumption?

The increase in population along with economic activities has caused Türkiye's energy consumption to increase rapidly. Primary energy supply, which was 117.3 MTOE in 2012, increased by 40.4% in ten years to 157.8 MTOE.

How much electricity will Turkey consume by 2035?

According to the results of the Türkiye National Energy Plan, electricity consumption is expected to reach 510.5 TWh by 2035.
