Is electricity cheaper at night?

This article is your complete guide to find out if electricity is cheaper at night. The short answer is yes! While it typically depends on your local energy rates, energy at night is cheaper than during the day. In this post, we will help break down electricity pricing with peak and off-peak hours, and exactly when electricity is the cheapest.

Why do some electricity plans come with free nights?

Some electricity plans offer free nights or weekends because electricity is cheaper during those hours. Power companies do this to stimulate a change of habits and shift the peak demand to off-peak hours, which reduces their overall operating costs.

Can you get cheap electricity on a Sunday?

These offer between eight and 15 hours of cheaper, off-peak electricity. British Gas customers can sign up to PeakSave Sundays, which offers cheap electricity for five hours on Sunday. And its PeakSave Green Flex scheme offers half-price electricity in one or two-hour blocks when there's a lot of renewable energy available.
