

Energy Storage System Performance Guarantee Insurance

Why do you need warranty insurance for your energy storage system?

Our warranty insurance solutions help to secure your sustainable business in the long run. Energy storage systems often involve the complex integration of multiple high-tech components. These are all prone to failure and malfunction, particularly over long periods of ten years and more.

How long do energy storage systems last?

Energy storage systems often involve the complex integration of multiple high-tech components. These are all prone to failure and malfunction, particularly over long periods of ten years and more. As a manufacturer and system integrator you have to provide your customers with warranties.

Why do we need reliable energy storage systems?

Renewables like wind and solar energy are intermittent by nature. To successfully master the energy transition, reliable energy storage systems are a must to provide the necessary supply stability.

Do warranty claims affect your financial stability?

As a manufacturer and system integrator you have to provide your customers with warranties. However, excessive warranty claims or a gap of warranties can negatively affect your financial stability. Serial failure events can cause high cumulative warranty claims

Solar Under Performance Insurance Coverage makes every solar project more bankable for every financial institution, bank or investor.
