

Tunisia's strategy outlines a comprehensive roadmap for the development of its green hydrogen industry. The plan includes a massive expansion of renewable energy, primarily solar and wind, to drive green hydrogen production. In addition, Tunisia will repurpose its existing natural gas pipelines to transport green hydrogen, connecting the country to European markets.

Tunisia: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

A 10MWp solar PV project in Gabès has signed a power purchase agreement with Soci t  Tunisienne de l'Electricit  et du Gaz. The project is owned by France's Akuo Energy Afrique in a consortium with its Tunisian partners HBG Holding, owned by the H di Bouchamaoui family, and Immobili re Chaabane group company Nour Energy.

From our origins as an Independent Power Producer, we have become a fully integrated energy company. Today, our expertise spans the entire renewable energy value chain, from development, financing and construction to operations, repowering and decommissioning with the objective of supplying cost-effective renewable energy to our clients.

According to the "BP Statistical Review of World Energy 2019", Tunisia's oil production stood at 50,000 barrels per day (bpd) in 2018, up from 48,000 bpd in 2017. ... This represents a change from the previous system in which a technical commission at the MEMER was the sole group responsible for evaluating any deal between foreign energy ...

Private equity giant Carlyle Group has sold its majority holdings in Tunisia-focused oil and gas producer Mazarine Energy to the company's CEO Edward van Kersbergen, Mazarine said on Thursday.

Clarke Energy est le distributeur agr  et partenaire de service pour les moteurs & gaz INNIO Jenbacher au Tunisie.

29/07/2024 20:04, TUNIS/Tunisia Tunis, July 29 (TAP) - Six memorandums of understanding for green hydrogen production in Tunisia were signed on July 29, 2024 in Tunis, in the presence of Industry, Mines and Energy Minister Fatma Thabet Chiboub. The agreements were signed by Tunisia and several foreign companies, according to a press release issued by the Industry ...

Without the vast hydrocarbons riches of its regional neighbours, Tunisia has relied heavily on policy decisions to maintain energy security. Nonetheless the country has been able to profit from its modest oil and gas reserves, especially with regard to the offshore Hasdrubal and Miskar fields in the Gulf of Gabès, which represent 65% of Tunisia's annual gas production.

Poulina Group Holding (PGH), the country's leading private industrial conglomerate, is preparing to add a new line of business to the long list of sectors in which it is already involved: renewable energy. The group founded by Abdelwahab Ben Ayed (who died in 2019) is about to launch its new subsidiary, Nova Green Volt, after months of preparation.. ...

Oslo, 5 August 2024: Scatec ASA, a leading renewable energy provider, and Aeolus SAS, part of the Japanese conglomerate Toyota Tsusho Group, have signed a partnership agreement to jointly develop and own renewable energy ...

This will be our group's first renewable energy project in Tunisia, and the first project for Aeolus since its establishment. Background; Tunisia relies on imports for most of its energy sources, such as oil and natural gas, with ...

The firm signed a Memorandum of Understanding (MoU) with Tunisia's Minister of Industry, Mines and Energy, Thabet Chiboub, to outline the development of the large-scale project. Expected to require around EUR3bn of initial investment, the project could combine 1GW of wind and 500MW of solar energy to produce up to 65,000 tonnes of hydrogen.

The Government of Tunisia (GoT) has embarked on an ambitious path to increase its renewable energy production. The GoT plans to reach 35% of renewable energy in the electricity system capacity by 2030, against 3% currently. Renewable energy is then ...
