

What is a battery tender?

Battery tenders are a type of battery charger that not only charges a vehicle but also maintains its full charge after the battery is full. They are also known as "maintenance chargers" and "float chargers". Once it's been charged, the tender stops the battery from charging, preventing overcharging and subsequent damage.

Who can use battery tenders?

Anyone can use battery tenders. They are a very versatile piece of technology with a number of great uses. As mentioned, those who deal with battery drainage on a regular basis will find the most benefit from them. If you live in an area that suffers long, cold winters, the battery of your vehicle is likely to suffer and weaken.

Are battery tenders safe?

Battery tenders are very safe. In fact, they are some of the safest technological devices that you could have in your collection. The reason being is that the way they are designed, they have a ton of safety features built-in. Here, we're going to cover each of those questions in depth so that you can rest easy. **What Are Battery Tenders?**
