

Energy storage industry field survey and industry analysis

How big is the energy storage industry?

Energy storage systems (ESS) in the U.S. was 27.57 GW in 2022 and is expected to reach 67.01 GW by 2030. The market is estimated to grow at a CAGR of 12.4% over the forecast period. The size of the energy storage industry in the U.S. will be driven by rising electrical applications and the adoption of rigorous energy efficiency standards.

What is the energy storage systems industry?

The energy storage systems industry by technology is segmented into pumped hydro, electro-chemical, electro-mechanical, and thermal. The energy storage systems reached USD 433 billion, USD 535.8 billion and USD 668.7 billion in 2022, 2023 and 2024 respectively.

What is the growth rate of the energy storage industry?

The energy storage industry recorded an annual growth rate of 5.69% with sustained market momentum of innovation, global demand, and clean energy policies. The market is valued at USD 288.97 billion in 2025 and is projected to reach USD 569.39 billion by 2034 with a 7.87% compound annual growth rate (CAGR) for 2025-2034.

What is the future of energy storage systems?

In addition, changing consumer lifestyle and a rising number of power outages are projected to propel utilization in the residential sector. Energy storage systems (ESS) in the U.S. was 27.57 GW in 2022 and is expected to reach 67.01 GW by 2030. The market is estimated to grow at a CAGR of 12.4% over the forecast period.

Who are the top investors in the energy storage industry?

The top investors in the energy storage industry have collectively contributed more than USD 34.1 billion to the sector. Here's a breakdown of the leading contributors: Rabobank has supported 268 companies with USD 5 billion, supporting the expansion of large-scale energy storage like 420 MWh. KKR has deployed USD 4.4 billion into 11 companies.

What are the top 5 energy storage systems companies in 2024?

Top 5 companies including BYD, General Electric, LG Energy Solution, Siemens and Samsung held a market share of over 40% in 2024. Major key players are working to develop cost-effective and wide range of ESS. Among these companies BYD is one of the largest share holding company in the energy storage systems industry.

The report aims to identify the potential economic benefits and challenges together with additional employment opportunities for Australian research and industry in the global and local energy ...

Energy storage industry field survey and industry analysis

In 2025, the commercial and industrial energy storage industry is set for substantial growth, fueled by global policy support, cost optimization, and renewable energy adoption. GSL Energy, a ...

For this reason, this paper will concentrate on China's energy storage industry. First, it summarizes the developing status of energy storage industry in China. Then, this paper ...

The report offers a comprehensive look at the evolving energy storage landscape, featuring insights from industry professionals worldwide. It examines key trends shaping the ...

The assessment adds zinc batteries, thermal energy storage, and gravitational energy storage. The 2020 Cost and Performance Assessment provided the levelized cost of energy. The 2022 ...
