

How much storage capacity does Italy have in 2021?

According to Italia Solare, Italy installed 431 MWh of storage capacity in 2021, compared to 112 MWh in 2020. The northern regions Lombardia and Veneto are particularly successful in increasing installed storage capacity by implementing specific funding schemes.

Does Italy need electricity storage?

As Italy's energy mix is increasingly composed of variable renewable energy sources, electricity storage will be needed to integrate power generated by renewables into the national grid and make it available when sun and wind energy are not accessible.

How will Italy invest in electricity storage?

Italy will promote investments in utility scale electricity storage to reach at least 70 GWh, and worth over Euro 17 bn, in the next ten years. The new storage capacity will be acquired through tenders published by Terna, the manager of Italy's high voltage grid. The next tender will be released in 2024.

Why is energy storage important in Italy?

In addition, electricity storage is critical to avoid congestion in the power grids since most of the renewable production originates in Southern Italy but is consumed mostly in the north. Therefore, PNIEC also provides for the installation of new energy storage infrastructure with the aim of reaching 22.5 GW of installed storage capacity by 2030.

Are battery energy storage systems needed in Italy?

Therefore, battery energy storage systems (BESS) are needed in Italy. The Italian market for BESS is growing rapidly and currently amounts to 2.3 GW but it almost exclusively consists of residential scale systems, associated with small scale solar plants, having a capacity of less than 20 kWh.

How many storage systems are there in Italy?

More in detail, 311,189 storage systems were present in Italy in mid-2023, with a total power of 2,329 MW and a maximum capacity of 3,946 MWh. Terna (the high voltage grid operator) also holds systems totaling 60 MW in power and 250 MWh in capacity.

Below is a summary of the reports prepared by Italia Solare regarding the first quarter of 2022 extracted from Gaud&#236; data (Gestione Anagrafica Unica degli Impianti means ...
