

What's happening in the energy storage sector in 2023?

A roundup of the biggest projects, financing and offtake deals in the energy storage sector that we have reported on this year. It's been a positive year for energy storage in 2023, with new markets opening up and supply chain bottlenecks and price spikes for battery energy storage systems (BESS) easing, though challenges remain.

Will energy storage grow in 2023?

Global energy storage's record additions in 2023 will be followed by a 27% compound annual growth rate to 2030, with annual additions reaching 110GW/372GWh, or 2.6 times expected 2023 gigawatt installations. Targets and subsidies are translating into project development and power market reforms that favor energy storage.

How much energy storage does the world have in 2023?

As of the first half of 2023, the world added 27.3 GWh of installed energy storage capacity on the utility-scale power generation side plus the C&I sector and 7.3 GWh in the residential sector, totaling 34.6 GWh, equaling 80% of the 44 GWh addition last year. Despite a global installation boom, regional markets develop at varying paces.

Will energy storage reach new heights in 2023?

The energy storage sector reached new heights in 2023, as showcased at the annual Energy Storage Carnival and the release of the Global Energy Storage Shipment Rankings for Chinese Enterprises by the Electric Energy Storage Alliance (EESA).

Will China add more energy storage capacity in 2023?

InfoLink expects China to add 39 GWh of energy storage capacity in 2023. The U.S. added 8.2 GWh of installed energy storage capacity in the first half of 2023, far behind anticipations. Constructions under the IRA face delays worse than expected.

How much money will be allocated to storage projects in 2023?

Residential batteries are now the largest source of storage demand in the region and will remain so until 2025. Separately, over EUR1 billion (\$1.1 billion) of subsidies have been allocated to storage projects in 2023, supporting a fresh pipeline of projects in Greece, Romania, Spain, Croatia, Finland and Lithuania.

American electric automaker Tesla's plans to produce energy-storage batteries in China moved forward on Friday, Dec. 22, 2023, with a signing ceremony for the land acquisition in Shanghai, ...
