

Ex84 exagrid Estonia

How does ExaGrid work?

ExaGrid provides tiered backup storage with a unique disk-cache Landing Zone, long-term retention repository, and scale-out architecture. The system scales as needed by adding ExaGrid appliances, which virtualize into a single scale-out system automatically, adding capacity and processing power while acting and being managed as one unified system.

Is ExaGrid a trademark?

ExaGrid reserves the right to change specifications or other product information without notice. ExaGrid and the ExaGrid logo are trademarks of ExaGrid Systems, Inc. All other trademarks are the property of their respective holders. ©2022 ExaGrid Systems, Inc. All rights reserved.

How many PB can a ExaGrid appliance support?

The product line's multiple appliance models can be combined into a single scale-out system of up to 6.14PB raw capacity, allowing full backups of up to 2.69PB. ExaGrid appliances are comprised of Intel® or AMD processors, enterprise SAS drives, RAID6 with hot spare, and ExaGrid software.

What are ExaGrid appliances?

ExaGrid appliances are comprised of Intel Quad Core XEON processors, RAID6 + Hot Spare storage using enterprise class SATA or SAS drives, and ExaGrid software. Each appliance plugs into a switch and is virtualized into a shared GRID. The media server is connected to the same switch and sees the appliances as one or more NAS shares.

Is ExaGrid ex a backup-to-disk NAS system?

The ExaGrid EX Series was originally designed as a scale-out NAS system but has since been optimized to be a backup-to-disk target. Since the system presents a standard NFS or CIFS/SMB interface, it can also support other file-based applications, especially secondary storage workloads.

Can ExaGrid appliances be deployed in the backup application software?

and with ExaGrid there are no agents to deploy or manage. When comparing ExaGrid appliances deduplication in the backup application software, it is important to keep in mind that using deduplication in the backup application software typically requires greater resources on the backup

By adding appliances to the grid, performance and capacity scale together. The ExaGrid system will automatically balance the data among the nodes when new ones are added to the grid. There are seven different models - the EX6, EX10, EX18, EX27, EX36, EX52 and the EX84. There are also six models available with encryption (denoted as "-SEC").
