How to make electricity with a PC fan?

One of the easiest way to make electricity with a pc fan is with four neodymium magnets. In this instructable i will show you how to make a generator with a pc fan and four neodymium magnets. CAUTION: NEODYMIUM MAGNETS ARE VERY POWERFUL. Stick a magnet at the left corner of one of the four sides with tape.

How much does a PC fan cost?

The PC Fan is Brushless DC (BLDC) Motor. It can be converted to a generator in 5 Minutes. I saw this project on already sold on Amazon for \$44 from here. I also found this great little tool on eBay for only \$36 from here. You can read this article in Arabic in my blog. You can read this article in English on my blog. The concept is simple.

How do you commutate a fan?

As the name implies , the electronics components convert DC into AC which makes the magnetic filed in the stator rotate. The electronic commutation is achieved by a small IC. To get the induced current from the motor used as a generator , you must remove this IC . This is what I 'll show you how. First remove sticker on the back of the fan.

How to install a fan?

Connect the supply wires in the winding terminals. Make sure that you connect the terminals (from which you will get the generated Voltage) in a way that makes the two sets of winding connected in series. Assemble the fan in its place and lock it with the piece of plastic I told you about. Put back the sticker.
