The solution is to store the energy in a (service) battery, from which the inverter will convert the stored energy into 230 V. The battery can be charged with shore power and also with the alternator during the trip. If you plan trips that last several days, make sure your battery has enough capacity to take over for 48 hours, as a rule.

The Livoltek 25KW Battery Ready PV System offers a cost-effective entry into solar energy with future-proof expand ability. This system offers a lower initial investment compared to a full energy storage solution, allowing customers to enter the solar market more affordably while retaining the option to upgrade to full energy storage system by adding the battery in the future.

Met deze Bliq thuisbatterij van 25 kWh (met 8 kW 3-fase ingebouwde omvormer) bespaar je direct op je energierekening. Jij kiest zelf waarvoor je je thuisbatterij gaat inzetten met Bliq Powerflow.
