Are solar panels a good investment in France?

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is EUR540 per household per year.

How many solar panels are installed in France?

Solar panel installations are increasing in France with the last year seeing over 200,000 installations across the country as prices fell. This includes installations from both professionals and from DIY kits, which allow homeowners to set up the panels by themselves. Read more: [Why record numbers of homeowners in France are installing solar panels](#)

How much does it cost to install solar panels in France?

However, as a rule of thumb, the French energy management agency 'ADEME' considers the cost to be EUR3,000 to EUR4,500 per kilowatt of power created. As most domestic installations generate around 3k/W of power, this means the cost of the panels themselves is EUR9,000 to EUR13,000. For 6 k/W of power expect to pay EUR16,000 to EUR19,000

Are there tax credits for solar panels in France?

Since 1st January 2014 there are no longer any tax credits available for the installation of photovoltaic solar panels. Nevertheless, in France, as in many other countries, there are incentives in place for property owners to sell electricity back into the grid at preferential prices.

Can you have solar panels on a property in France?

Other rules may apply if your property in France is located in certain historic areas. Read more: [Can you have solar panels on homes in historic areas of France?](#) You will also need to contact Consuel for an Attestation de Conformité to confirm your installation is safe to be connected to the main power grid, which costs EUR180.
