The far right came close to power in France. What about the rest of Europe? ... the EU in Brussels and seats of government across Europe following the first round of France's parliamentary vote.

President Macron has been promoting the concept of European sovereignty and strategic autonomy for quite some time. His vision of a strategically autonomous Europe is based on the premise of profound geopolitical shifts and a new reality of big power rivalries. Still, Paris will have to convince skeptical EU Member States about the soundness of this concept.

The European Union's REPowerEU Plan, initiated in May 2022, has put nuclear energy at the forefront of its strategy to secure energy and achieve climate goals. France continues to heavily invest ...

With the creation of Germany in 1871, the old balance of power involving France, a rump Brandenburg-Prussia, Austria-Hungary, and Russia was replaced by a new system. Under the leadership of Chancellor Otto von Bismarck, Germany forged ahead in 1873 by joining the two most conservative powers in Europe--Austria-Hungary and Russia--to form the ...

Post n°329. Against a backdrop of sharply rising oil and gas prices, France's energy balance deteriorated by EUR 68 billion. With a structural surplus of electricity, France could have benefited from a positive shock for this part of its energy supply, but, according to our estimate, the unavailability of part of its nuclear power fleet added EUR 16 billion to the energy bill in 2022.

In accordance with Nys's thesis that the hegemon in Europe produced fewer balance-of-power texts, France was the target of criticisms of other "foreign" balance-of-power writers. Footnote 68 Solange Rameix comparatively examined the significance of the pulpit for war propaganda in the 1690s, especially in relation to the Nine Years' War ...

This month, RTE, the French grid operator, is due to publish six scenarios for France's future energy mix by 2050, ranging from 100 per cent renewable energy to several new nuclear plants.
