

How much energy does French Guiana use?

Electricity grid in French Guiana In 2014, the external supply represented around 80% of the total primary energy consumption (235 ktep). Transport and electricity were the most intensive sectors regarding the total primary and final energy consumption (222 ktep) in 2014 .

Is biomass a source of electricity in French Guiana?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. French Guiana: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

How does ceog fit with French Guiana's energy strategy?

The population of French Guiana is very quickly increasing. Guiana has to face a considerable energy deficit, especially in the west where the demographic growth is booming. By providing several MW of reliable and clean energy, CEOG fits with French Guiana's energy strategy.

Is French Guiana a country based on fossil fuels?

French Guiana as a French overseas territory is heavily dependent on imported fossil fuels. It is a two-tier society where there is a large gap between the coastal and the inland areas concerning energy access. Compared to the coastline, the household electrification rate in the rural areas remains lower.

Does French Guiana have a pluriannual energy program?

As Guadeloupe, Martinique, Reunion and Mayotte, French Guiana has its own pluriannual energy programming. With an objective of energy autonomy set on the 2030 horizon, they have to accelerate the large-scale clean energy deployment to improve energy access.

Does French Guiana have a role in the National Energy Transition?

French Guiana as a French overseas territory can play a fundamental role in the national energy transition. Even though, it is already well positioned regarding the share of renewable energy in the final energy consumption, its dependence on fossil fuels remains a problematic.
