The data reached an all-time high of 77.790 % in 2016 and a record low of 41.190 % in 2000. GE: Access to Clean Fuels and Technologies for Cooking: % of Population data remains active status in CEIC and is reported by World Bank. The data is categorized under Global Database's Georgia - Table GE.World Bank: Energy Production and Consumption.

How it works? Solar panels contain photovoltaic cells made of silicon that convert incoming sunlight into electricity instead of heat. When photons, or light arrays, hit the thin layer of silicon on top of the solar panel, they knock electrons off the silicon atoms and create an electric current (DC) in the solar cells on top of the panels.

Georgia Power, the state's largest electric utility serving 2.7 million customers, has been awarded more than \$160 million in funding by the Department of Energy (DOE) through its Grid Deployment Office.
