What is a PAYGO solar company?

PAYGo companies enable rural, low income populations to access modern clean energy solutions. Our analytical tools and client services help build investor confidence in this innovative business model. The impact of PAYGo solar companies is undeniable.

What are the features of the PAYGO Solar System?

Each system comes with 80Wh or 160Wh battery capacity which allows to run various household devices. Two solar panels of 50W each provide clean solar power. Whenever more power or battery capacity is needed additional systems can be stacked on top. PayGo integration allows flexible payment in installments.

How does a Pay-as-you-go (PAYGO) approach work?

For Pay-as-you-go (PAYGO), customers usually pay 10-20% as an upfront cost and the rest as a loan over a period of 1-2 years. It may take more than 3 years for PAYGO customers to convert product inventory into cash flow. This article explains briefly how PAYGO works for customers paying for electric services from off-grid solar systems as well as for the companies offering this service.

Does PAYGO provide cooking gas in Kenya?

In Kenya, PAYGO is offered for cooking gas by M-Gas. Customers do not have to buy the cooking gas cylinder or burners, which often cost more than KES 6,000. Instead, they only pay for refilling a cylinder, which costs above KES 2,000 per cylinder. The company provides a set of a gas cylinder and 2-burner gas cooker to each customer free of charge upfront.

The VITALITE PAYGO Solar Home System basic offering consists of a 12-volt photovoltaic module, including a 7-watt solar panel, battery pack, and a dual-purpose controller. The PAYGO technology combines a regular charge controller with a time-based meter board that will shut down the system's
