

Why is South Sudan facing a serious energy crisis?

South Sudan faces a serious energy crisis due to a number of factors, including devastating conflicts (e.g. 1955-1972, 1983-2005 & 2013-present) and reliance on the fossil fuel source. The country has the lowest energy consumption rate in Africa and the highest cost of producing energy (World Bank, 2016).

Is oil the right form of energy for South Sudan?

However, oil is not the right form of energy to meet South Sudan's rising energy demand due to (1) high costs (e.g. high costs of fuel and generator repair), (2) sporadic diesel fuel supply, (3) inefficiency and unsustainability and (4) detrimental health impacts on people and environment.

Why is energy infrastructure underdeveloped in South Sudan?

Partly due to the civil wars (e.g., 1955-1972, 1983-2005 & 2013-present), energy infrastructure remains very underdeveloped in South Sudan. Despite a peace agreement in 2015, which has been revitalized recently, conflict has impeded the country's effort in transitioning to renewable energy.

How does lack of electricity affect business in South Sudan?

Specifically, over 75% of firms surveyed in South Sudan complained that lack of energy hinders business operation. Second, lack of electricity drives up costs as businesses and families try to produce their own power, which is extremely expensive.

Does South Sudan need electricity to drive industrial development?

Electricity prices in South Sudan are twice the prices of electricity in Africa and are five times the prices in other developing countries (Ranganathan and Briceno-Garmendia, 2011). As a resource rich country that needs to attract direct foreign investment, South Sudan definitely needs power to drive industrial development.

How important are energy thresholds in South Sudan?

appliances for cooling, heating and private transportation (Whiting et al., 2015, UN 2010). These thresholds have been set to meet the UN's goal of universal access to modern form of energy by 2030 and they are important in guiding South Sudan's energy policy.
