

Is smartflower still available in Europe?

Since the Austrian company SmartFlower Energy went bankrupt, it is no longer purchasable in Europe. This said, an equivalent model simply named "SmartFlower" is still commercialised in the US. This model is very similar to the POP version, aside it being slightly more powerful (205 kWc) and available in fewer colours (white, grey, green and blue).

Does smartflower work in France?

Additionally, the SmartFlower can work in virtually any climate, as it can work at any between -20°C and 50°C. It will thus be usable anywhere in France, at any time of year. The first model introduced was SmartFlower POP.

Who owns smartflower Energy Technology GmbH?

But thankfully, SmartFlower Solar LLC has acquired most of the assets of Smartflower Energy Technology GmbH from its insolvency administrator, and because of this Smartflower is now actively available in Europe.

What is a smartflower Solar System?

All-in-one solar solution without complex installation (plug and play). Thanks to smart tracking, the Smartflower folds out automatically every morning and tracks the sun during the day with its 2-axis controller. Smartflower has a considerably longer peak phase than a rooftop solar system and produces energy even in the fringe hours of the day.

How much energy does a smartflower system use?

Lastly, the SmartFlower system has an annual energy output of 3,800-6,200 kWh. With the average US household using 10,800 kWh per year, you can only expect your SmartFlower system to provide you with around 40-60% of your energy needs.

What features does the smartflower include?

Some of the other features that the SmartFlower includes are: Smart Cooling- The system includes rear ventilation to keep the module up to 18°F cooler than it would be otherwise. This helps with the solar cell's efficiency, as solar panels function differently in varying temperatures. For the SmartFlower, this means 5-10% more output on average.
