

Could a 500MW solar project be built in South Norfolk?

Island Green Power is seeking public opinions on provisional plans for a nationally significant solar and storage project in South Norfolk. The renewable energy developer has launched public consultation on early-stage proposals for a 500MW solar development co-located with a battery energy storage system (BESS) that could have up to 500MW output.

Does Greenpower have a hydro project?

GreenPower also has significant hydro experience having constructed their 500kW Carie hydro project near Pitlochry in Perthshire which they own and operate. In addition GreenPower has over 200MW of solar and wind projects in active development.

Where is Island Green based?

Island Green already operates solar farms in Salhouse and Trowse in Norfolk, as well as other counties in the East of England.

When will Island Green Power submit a DCO application?

Island Green Power said it aimed to submit its DCO application to the Planning Inspectorate in late 2025. South Norfolk Council has been approached for comment. Follow Norfolk news on BBC Sounds, Facebook, Instagram and X. The developer says the project would be able to provide energy over the next 60 years.

Will Island Green get a DCO for Cottam solar project?

The non-statutory consultation comes after Island Green revealed plans for the development early in September, just one week after energy secretary Ed Miliband granted the developer a DCO for the 600MW Cottam Solar Project.

The demand for renewable energy rarely matches the production level precisely over time. For this reason, renewable sources of energy cannot yet fully replace conventional power plants. Green Power Island proposes a method for storing ...
