

Sustainability at Gridstore. Sustainability is very important to us in all our endeavours. We consider sustainability in logistics to be directly linked to our undertaking to permanently reduce CO2 emissions that are harmful to the climate and the environment, to avoid the wastage of resources and to create a balanced symbiosis of ecology and economy.

SolarBoost Technology Empowers Solar Panels What is SolarBoost?SolarBoost is a modular 2.7kWh to 8kWh plug-and-play, centrally controlled power management and energy storage that costs less than current grid scale batteries stalled under each solar panel using existing infrastructure, SolarBoost can be immediately installed without further approvals. How is ...

DNV GL's business leader in energy storage, Martijn Huibers, and Paul Raats, one of the company's solar analysts, recently wrote about GRIDSTOR, its aims and some of the ways the guide could help accelerate development in the global energy storage market for Solar Media's downstream PV technical journal PV Tech Power, out now.

The multiple ecological crises provoked by human activities are linked to and exacerbate the other political, social and economic challenges currently faced by North Africa. 1 In Western Sahara, these challenges and crises are shaped by its continued condition as a colony. This report aims to contribute to conversations on a just transition - that is, a transition to ...

Green hydrogen (GH₂) prospects in Africa are developing at breakneck speed. But the biggest questions remain unanswered. Yes, Africa has the resources but can these highly capital intensive projects be made bankable while lenders demand heavy risk premiums on African projects?

Morocco risks implicating other states by exporting Western Sahara energy, for instance to the EU. The EU has promised not to import green energy from the territory, but is unlikely the EU will be able to differentiate energy generated in Morocco proper and energy generated in the occupied territory, as it will pass in cables under Strait of ...

Western Sahara Resource Watch, a Brussels-based NGO allied to the independence movement, estimates that by the end of the decade occupied Western Sahara could be supplying half of all Morocco's wind energy and a third of its solar energy, much of it headed for Europe. Morocco insists that the territory is part of Morocco.

At Gridstore, we know that energy storage is the missing link for around the clock supply of sustainable clean electricity. We specialise in identifying and developing energy and storage projects where communities want them and where the grid needs them most. ... At Gridstore we work with partners that want to set new standards in how our ...
