

Combining the most respected global indexes on pollution, climate change, policy, energy, oceans, biodiversity we have produced an overall Global Index, which will be updated annually. This is the Global Sustainability ...

San Marino: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.
