

Heard and McDonald Islands bess feasibility study

What is the history of Heard Island and McDonald Island?

General map of Heard Island and McDonald Islands. Periodic Australian research expeditions have been made to Heard Island since the Australian ANARE station was closed in 1955, and occasional visits have also been made by other nations. There are only two brief recorded landings at McDonald Island, in 1971 and 1980.

What is the main human activity at Heard Island?

Terrestrial and marine research, as part of the Australian Antarctic science program, is currently the main human activity at Heard Island and research expeditions are mounted every few years. However, commercial fishing in the adjacent waters is the most frequent human activity in the region.

Is Heard Island a sub-Antarctic island?

Importantly, Heard Island is the largest sub-Antarctic island with no known human introduced plant species or vertebrate predators. The terrestrial flora is typically sub-Antarctic, with low-growing herbaceous flowering plants and bryophytes comprising the major components of the vegetation.

What is the Heard Island Wilderness Reserve management plan?

The Heard Island Wilderness Reserve Management Plan was made under the EPMA and came into effect in 1996. The management plan provided priorities for decisions that would affect the Territory, defined appropriate uses and activities, outlined management areas and contained management strategies for protecting the Territory's values.

Where is Heard Island located?

Key Words: sub-Antarctic islands, Heard Island, McDonald Islands. The Heard Island and the McDonald Islands (HIMI) group is located in the Indian Ocean sector of the Southern Ocean at approximately 53°S; 73°E, some 4000 km southwest of Western Australia, 4700 km southeast of Africa and 1000 km north of the Antarctic continent.

How are the landforms on Heard Island sculpted?

The landforms on Heard Island have been sculpted by the interaction of diverse processes, including a long and complex geological history (Quilty 2007), multiple episodes of volcanic activity, erosion and transport by wind, water and glaciers, moulding by vigorous marine processes and the influence of gravity (Kiernan & McConnell 1999).

The Heard and McDonald Islands are an external territory of the Commonwealth of Australia are located approximately midway between Australia and the continent of South Africa. ... The intact ecosystem of the islands ...

Heard and McDonald Islands bess feasibility study

Heard Island and McDonald Islands are uninhabited, barren, Subantarctic islands in the Southern Ocean, far due south of India and roughly 400 km southeast of Kerguelen of the French Southern and Antarctic Lands. The islands are administered by Australia and listed as a UNESCO World Heritage site. Although it's administered by Australia, the islands are approximately 4,000 ...

???????????? (???????????????????? Heard Island and McDonald Islands ?? HIMI) ????????????????? 1947???????????????? 1997????????????????(????)????????

A Ilha Heard e as Ilhas McDonald (nome oficial: Território das Ilhas Heard e McDonald), [1] [2] [3] é um território externo australiano que compreende um grupo vulcânico de ilhas antárticas inóspitas e desabitadas, localizadas no oceano Índico, a cerca de dois terços do caminho de Madagáscar para a Antártida. A área total do grupo é de 372 km² e tem 101,9 km de litoral.

McDonald Island is much smaller (2.5 km²), about 100 000 years old and totally ice-free, and is predominantly composed of phonolitic rocks. 9, 10 During the campaign, signs of volcanic activity ...

In January 1991, the Heard Island Feasibility Test (HIFT) was carried out to establish the limits of usable, long-range acoustic transmissions. Coded acoustic signals transmitted from a source near Heard Island in the southern Indian ...

Heard and McDonald Islands Heard and McDonald Islands This is one of the wildest and remotest places on earth. Heard Island is dominated by Big Ben, Australia's highest mountain and an active volcano, under a deep mantle of snow and glaciers. On the horizon, the volcanic McDonald Islands rise precipitously out of the world's stormiest waters.

Satellitbild av sydspetsen av Heard Island. Kap Arkona ses på vänster sida av bilden, med Lied Glacier strax ovanför och Gotley Glacier strax nedanför. Big Ben Volcano och Mawson Peak ses längst ned till höger på bilden. Heard- och McDonaldöarna, Heard and McDonald Islands, är en obebodd australisk ögrupp i södra Indiska oceanen.

To ensure a smooth operation of soon to be constructed PV+BESS, grid impact study for the plant interconnection to the power system is essential, by conducting the study we will be able to determine the optimum BESS sizing and to assess the technical feasibility of the Solar power plant interconnection from the electrical aspect.
