How much energy does Honduras use?

The total primary energy offer in Honduras is around 4.62 Mtoe or 53,730.6 GWh. The main source of primary energy is petroleum (53%) followed by combustible renewable and waste (44%), and coal (3%). The residential energy consumption is around 47% of the national consumption, of which 86% are provided by biomass, primarily firewood.

Will the use of firewood change in Honduras?

The poverty of the population, the access to other energy sources, as well as the country's rural population density, determines the usage of firewood as a main source of energy in Honduras. This could mean that the usage of firewood will not change in the short term, if the actual conditions of the energy sector in Honduras persist.

How many people are without electricity in Honduras?

In absolute terms, it is estimated that more than 386,000 households or more than 1.93 Million people in rural areas remain without access to electricity. The national electricity system is concentrated in the western part of Honduras while the sparsely populated eastern part remains mainly beyond economic line-extension distances.

What is the least expensive solution to the energy crisis in Honduras?

(Productive uses). SHS are comparatively cheap but energy service is limited and business and service systems are critical and often have high transaction costs. The World Bank concludes that the least expensive solution to reach the goal of the Honduras Government of 400,000 new connections by 2015 would be the dissemination of SHS.

EM3 Meets SHV Energy . In November 2020 when EM3 became part of the SHV Energy family of companies, our dream of being a world leader in our sector, providing innovative energy solutions to industrial customers, became a reality. Covid-19 has meant that all meetings and introductions had to be held online. Thankfully due to ...

About EM3: EM3 is an International energy management solutions company, dedicated to optimizing energy performance in industrial manufacturing facilities. As part of the SHV Energy group with a global presence and a commitment to sustainability, EM3 has delivered energy management services in 24 countries worldwide over the past two years. ...

Honduras: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO<sub>2</sub> - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

EM3 is a global leader in innovative energy management solutions, dedicated to enhancing the energy
