

Host energy systems Belarus

What technology does host energy systems offer?

These AD plants can be supplied with in-house biogas upgrading, bio-LNG, bio-CNG, and CO₂ liquefaction technology. HoSt Energy Systems engineers and builds biomass, waste, and RDF-fired heat and power boiler plants that produce renewable heat and power.

Who is host energy systems?

HoSt Energy Systems is a family company from the Netherlands and leader in high-tech renewable energy systems. Our systems are equipped with proprietary technologies. Designed to maximize efficiency and environmental performance. By offering a wide portfolio range in one place, we realize sustainability ambitions.

Why should you choose host energy systems?

Industrial biomass and waste-fired boiler plants for renewable heat and power generation. Easily integrable with carbon capture technology for CO₂ recovery and bioCO₂ production. HoSt Energy Systems is a family company from the Netherlands and leader in high-tech renewable energy systems. Our systems are equipped with proprietary technologies.

How does host energy systems produce biogas?

HoSt Energy Systems builds turn-key biogas plants utilizing anaerobic digestion to produce biogas from any organic residual stream. These AD plants can be supplied with in-house biogas upgrading, bio-LNG, bio-CNG, and CO₂ liquefaction technology.
