

Household stacked energy storage power supply price

How many kWh can a stacked energy system handle?

The system's capacity ranges from 9.6 kWh to 38.4 kWh per Stack, with the ability to connect up to 15 units in parallel for a staggering total capacity of 576 kWh. The modular design allows for easy installation in under 30 minutes and provides the flexibility to expand the system as energy needs grow.

How much power does a Stack D system produce?

The Stack'd Series boasts an impressive output of up to 14.4 kW continuous power and a surge capacity of up to 24 kW for 10 seconds. The system's capacity ranges from 9.6 kWh to 38.4 kWh per Stack, with the ability to connect up to 15 units in parallel for a staggering total capacity of 576 kWh.

What is a HomeGrid stack battery?

The HomeGrid Stack'd Series battery is the ultimate storage solution for residential and small commercial projects.

What is a stack'd series high voltage BMS?

These innovative modules automatically maintain batteries at ideal operating temperatures, preserving capacity and function. The Stack'd Series High Voltage BMS allows pairing with HV inverters, offering an adjustable output of 260-400v. This unit provides the same benefits as the classic Stack'd Series battery but with higher output voltage.

Is solar electric supply a distributor for HomeGrid?

As an Elite Distributor for HomeGrid, Solar Electric Supply is proud to offer customers exclusive access to the cutting-edge Stack'd Series battery system, providing top-tier support and competitive pricing to ensure your project's success from the start. Contact Us today to learn more!

What is a HomeGrid stack?

The HomeGrid Stack'd Series is designed with cutting-edge technology and user convenience in mind. By utilizing Lithium Iron Phosphate (LFP) chemistry, these batteries prioritize safety and longevity, surpassing the performance of other chemistries in the stationary storage market.
