What is high performance battery (HPB)?

A team of scientists working for Bonn-based company High Performance Battery (HPB), led by Prof. Dr. G nter Hambitzer, has achieved a decisive breakthrough in battery and storage technology with the development of the world's first solid-state battery with outstanding properties to production readiness. Courtesy of High Performance Battery (HPB)

Is HPB solid state electrolyte safe?

By using the HPB solid state electrolyte developed by us, the performance of our battery will remain almost constant over its lifetime. No matter how heavy the battery is used. Our battery technology is safe because our HPB solid state electrolyte is non-flammable and the battery is non-explosive.

What is HPB solid-state battery & HPB electrolyte?

Overall, HPB solid-state batteries and HPB solid-state electrolyte make an important contribution to the energy and mobility transition and to reducing dependence on raw materials. While the annual demand for storage was still 180 gigawatt-hours in 2018, it is expected to exceed 2,000 gigawatt-hours by 2030.

Why should you choose HPB solid-state battery?

As a new basic technology, our HPB solid-state battery makes an important contribution to this. The combination of its properties is a "game changer" and a success factor for the success of the energy transition. The characteristics of our HPB solid-state electrolyte have already been confirmed by independent research institutes.

What makes HPB a good battery?

For the automotive industry, which develops its own high-performance rechargeable batteries, HPB provides its safe, robust and outstandingly conductive HPB solid-state electrolyte. In this way, the HPB solid-state electrolyte ensures that sufficient power is available even at extreme temperatures.

Are HPB batteries safe?

Our battery technology is safe because our HPB solid state electrolyte is non-flammable and the battery is non-explosive. No critical raw materials are needed for production. This also improves the environmental balance by more than half compared to conventional lithium-ion batteries.

Sao Tome & Principe is, however, eligible to benefit from the African Growth and Opportunity Act (AGOA), a framework for US trade, investment, and development policy for sub-Saharan Africa. STP has signed bilateral investment agreements with Portugal, Angola, and Gabon, but is party to no bilateral taxation treaties.

STP currently has no free trade zones or free ports. In 1995, STP passed a regulation creating the Free Zone Authority (AZF) which included one free zone in Sao Tome (Sao Tome Airport Free Zone) and another in Principe (Agulhas Bay Free Zone) - as well an Offshore Business Center (for offshore financial transactions and other activities).

The two labor unions-the General Union of Workers of Sao Tome and Principe and the National Organization of Workers of Sao Tome and Principe-negotiated with the government on behalf of their members as needed. There were no reported attempts by unions or workers to negotiate collective agreements during the year. b.

Sao Tome and Principe is highly aid-dependent but, given its size and insularity, has a limited donor presence. The World Bank, African Development Bank, European Commission, International Monetary Fund, and United Nations agencies work closely in the country and have strengthened their coordination mechanisms in
