

# Hungary's energy

How much energy does Hungary produce?

Hungary's primary energy production has followed a decreasing trend over the past decade, totaling approximately 449 petajoules in 2022. During the same year, Hungary sourced most of its electricity from nuclear power plants, accounting for 45 percent of the total electricity generation.

Where does Hungary get its electricity from?

During the same year, Hungary sourced most of its electricity from nuclear power plants, accounting for 45 percent of the total electricity generation. Fossil fuels, such as natural gas and coal, were the second most-used source of power in the country.

What happened to Hungary's energy needs in March 2022?

Hungary's energy needs were lower each month from April 2022 than a year earlier, and decreased at rates higher than 10% from September 2022 to March 2023 - except for February. The use fell by 16% this March, partly owing to the lower industrial output than in the same month of the previous year and to the milder-than-usual weather.

What percentage of Hungary's energy is renewable?

According to preliminary estimates from the Hungarian Energy and Public Utility Regulatory Authority (MEKH), renewables contributed for 19.2 percent of Hungary's energy generation in 2021. Among renewable sources, solar generated the most with 3,793 GWh, a 54.3% increase since 2020.

Will Hungary build a new nuclear power plant?

Hungary is planning to construct a new nuclear power plant. Although renewable energy generation has expanded significantly, the sector's growth has been slowed down recently due to the lack of sufficient grid connection points.

How much energy does Hungary use in the year 2030?

According to estimates, Hungary's energy consumption in the year 2030 is expected to be 60 terawatt-hours (TWh). Traders and universal service providers sell imported and domestically produced natural gas to domestic users. Six regional distributor corporations - owned by three market players - oversee the natural gas distribution systems.

L&#225;szi&#243; Zsemberi, founder and owner of Z-Renewable Energy Services and Prored Solutions, writes about a new concept born to boost the utilisation of Hungary's geothermal energy potential.

Driven by a need to move away from Russian gas, Serbia is looking at nuclear energy and considering partnerships with France, China, Hungary, and Britain. But each option opens a geopolitical ...
