

Several hundred years ago, a cataclysmic catastrophe nearly ripped your galaxy apart - an impassable ring of torn hyperspace fabric appeared in the center of the galaxy, which normal hyperspace engines can't overcome. ... But always keep an eye on your ship's maneuverability and energy requirements. Adjust your ship perfectly to its ...

The climate of the Pitcairn Islands, a British territory in the Pacific Ocean, just south of the Tropic of Capricorn (therefore in the Southern Hemisphere), is subtropical oceanic, characterized by a hot summer from December to March, when the maximum temperatures at sea level are around 27/28 °C (81/82 °F), and a very mild winter from June to September, with maximum ...

Hyperspace energy has a high permittivity and therefore a low speed of light. This low speed of light gives hyperspace energy a luminescent quality which is seen as a white mist (FIG. 1). [0034] From Einstein's General Theory of Relativity, the stress pressure T on spacetime is proportion to the square of the ratio of the electric field E to ...

Zealand. Henderson Island is located 200 km East Northeast of Pitcairn Island. Oeno is located 120 km Northwest of Pitcairn Island. Ducie is located 472 km East of Pitcairn Island. Latitude and Longitude: Pitcairn Island: 25 04 S, 130 06 W. GMT minus 8 hours. Henderson Island: 24 22 S, 128 20 W. Oeno: 23 56 S, 130 44 W. Ducie: 24 40 S, 124 47 W.

New Zealand, and the Australian territory of Norfolk Island, are Pitcairn's jump off points, and home to the bulk of Pitcairn's diaspora. It is a generally accepted fact that, due to the severity of their crimes, the remaining convicted men would be denied permanent settlement visas, and, in some cases, even transit visas, through either ...

Hyperspace is distorted near large gravity fields in normal time-space so the navigation in the ship must calculate the course. Flying into a distortion would knock the ship out of hyperspace and into a planet or a star and you obviously don't want that to happen. It's possible to be awake during a hyperspace travel.

A highlight of Pitcairn Island will see passengers immersing themselves in the living history and culture of the island, ... The 12-day Pitcairn and Gambier - In the footsteps of the Bounty Mutineers Cruise on board Aranui 5 costs from Euros 5,278 pp. Price includes accommodation in a Double Stateroom with obstructed view,

(based on two ...

Following an EU commissioned study in 2017, the EU agreed to fund a Renewable Energy project for Pitcairn to replace fossil fuel with Solar Power under the EDF 11 Regional Envelope and we have been working with ...

Various forms of evidence show the earliest settlers of the Pitcairn Islands were Polynesians who occupied Pitcairn and Henderson for several centuries until the islands were abandoned: Henderson most likely before the 16th century and Pitcairn in the 17th or early 18th century. The islands were uninhabited when they were discovered by Europeans.

Renewable Power for Remote Communities. The preceding maps of Solar radiation (Solargis) and Wind energy (Global Wind Atlas) show that Oceania is able to be roughly split into regions close to the Equator and those farther ...

Renewable Power for Remote Communities. The preceding maps of Solar radiation (Solargis) and Wind energy (Global Wind Atlas) show that Oceania is able to be roughly split into regions close to the Equator and those farther away with different amounts of Solar radiation and ranges of Mean Wind Speeds. Solar Power appears to be the most significant source of Renewable ...

Adamstown | Image credit: Balou46, CC BY-SA 4.0, via Wikimedia Commons Adamstown: The capital city and the island's only settlement, Adamstown is where you can meet the locals and learn more about Pitcairn Island's history. You can stroll around the town and explore the market area, the post office and the treasury. Pitcairn Islands Museum: Another ...

Hyperspace jump energy requirement is (primarily) based on your ship mass. The bigger ship, the more energy to move it. When you are charging for a jump (=boosting in the calculated direction), your jump drive starts draining your ship's energy. Since your reactor is usually not big enough to accommodate this increased energy requirement, it ...

The reason I know about hyperspace is because (1) I have been in hyperspace on a number of occasions and have experienced Einstein's time dilation according to his General Theory of Relativity, (2) I have experienced more than one full-body hyperspace teleportation over a distance of 100 meters, (3) we have been able to create a wormhole ...

The mutineers turning Bligh and some of the officers and crew adrift from HMS Bounty on 29 April 1789. Adamstown, the only settlement on the Islands. In 1790, nine of the mutineers from the British naval vessel HMS Bounty, along with the native Tahitian men and women who were with them (six men, 11 women, and a baby girl), settled on Pitcairn Island and set fire to the Bounty.

A large part of Pitcairn Island's early history will forever remain a mystery. The full history of both the earlier

Hyperspace energy Pitcairn Islands

Polynesian community and of the Bounty settlers will never be completely known.[See "Pre-Mutineer History"] Differing theories and contradicting stories concerning the events that took place after the mutineers arrived at Pitcairn, have been told.

Welcome to /r/PitcairnIslands, a place for content and discussions related to the Pitcairn Islands. u/hapsbro. ... Cable ferries are very effective and really low energy consuming comparing to normal ferries and long boats. For example, the 22 meter, 22 tonne Pritzerbe Ferry has 23 kW installed in comparasion the motor ferry "Luise" on the ...

Environmental Gradients and Energy. Charles A.S. Hall, in Encyclopedia of Energy, 2004 2.6 Niches, Succession, and Competition. In the context of this energy balance perspective, a Gaussian niche is the volume of all possible energy profits for a species within the hyperspace of all gradients to which the organism might be exposed. A Hutchinsonian niche is ...

Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy. The goal is to replace 95% of the current diesel consumption on Pitcairn Island (75,000 liters per year) with ...

Pitcairn er hovedøen blandt Pitcairn Islands og den eneste beboede ø. Pitcairn Islands er en britisk øgruppe på fire øer i det sydøstlige Polynesien, Stillehavet.Navnet Pitcairn bruges også om den samlede øgruppe. Pitcairn er den sidste resterende britiske koloni i Stillehavet. Øen er mest kendt for at være hjemmet for efterkommerne af deltagerne i mytteriet på Bounty og tahitierne ...

Hyperspace travel is sometimes depicted as a starfield that streaks toward the viewer. A visual effect like this was first used in the 1974 film Dark Star, and it became a popular cinematic depiction, with a similar effect being used in the Star Wars franchise.. One of the main reasons for the concept's popularity in science fiction is the impossibility of faster-than-light travel in ...
