

Imitate WeChat with the radio and television network box

What is the WeChat universe?

Known in China as Weixin, the WeChat app's various functionalities are now deeply woven into the fabric of daily life for its users. As such, this is now known as the WeChat Universe, and it continues to expand into new territories and new aspects of daily life.

Why is WeChat so popular in China?

The preference among Chinese consumers for an all-encompassing, holistic view plays very well with the reach of the WeChat ecosystem. WeChat has built its success on integrating its way into its users' daily lives and integrating all of their most popular brands and services.

Is WeChat similar to Facebook?

WeChat is a major player in the social space, so in that sense it is a bit like Facebook. This brings it into direct competition with Weibo in China. It contains instant messaging, so it is like WhatsApp. It has an app store, so it has similarities with Apple and Google. However, these comparisons do not tell the full story.

What is WeChat Pay & how does it work?

It is an addictive experience and provides everything people want from their smartphone, from gaming through to a slick payment system. WeChat Pay, also known as WeChat Wallet, is a user's 'digital wallet' and it is used to pay for everything, either via a tap of the phone or a snap of a camera.

Is WeChat gaining popularity in South America & Africa?

Most of those international accounts are held by Chinese people who have moved abroad, but WeChat has started to gain some ground in South America and Africa. In the case of the former, an advertising campaign featuring Lionel Messi certainly won't have harmed their popularity. Africa has been a focus area for expansion, too.

Can You monetize WeChat Pay?

Within WeChat Pay, there are many options. A user can send and receive gifts, pay their rent, or donate to a wide variety of charitable causes. The money held within the wallet can be invested by WeChat too, so the possibilities to monetize this technology are endless.

These are bots that are designed for interacting with humans in voice or text-based conversation. Chatbots simulate human conversation by responding to certain phrases or words with programmed responses. Wechaty is a software program for developing chatbots for Instant Messaging services such as Wechat and Whatsapp.
