Republic of the Marshall Islands National Energy Policy and Energy ... The Republic of the Marshall Islands (RMI) consists of two groups of 29 atolls and five raised coral islands extending 750 miles (1200 km) north-south and 800 miles (1300 km) east-west, with the capital Majuro located 2000 miles (3200 km) from both Honolulu and Tokyo.

The Marshall Islands have an extremely high dependence on energy sources imported by sea. If the Nationally Determined Contributions (NDCs) are to be reached, the country must convert the fleet to low-carbon propulsion technologies. The country's "2050 Strategy" also envisages full decarbonisation by 2050 - especially in maritime transport.

Integrated Energy Solutions. NREL accelerates energy transitions through a system-of-systems approach that considers technology, policy, social, and market systems. We inform technology and policy research at NREL through mission-driven work to assist partners at home and around the world in meeting ambitious energy goals.

Effective waste management is a major challenge for Small Island Developing States (SIDS) like Maldives due to limited land availability. Maldives exemplifies these issues as one of the most geographically dispersed countries, with a population unevenly distributed across numerous islands varying greatly in size and population density.
