

Intelligent energy services Greenland

What is Greenland's primary source of energy?

Historically, Greenland's primary source of energy has been imported fossil fuels. However, times change and 55-60% of Greenland's energy in recent decades came from renewable resources.

Does Greenland have a place-based approach to energy production?

The lack of electricity transmission between urban settlements in Greenland necessitates a place-based approach to energy production. In keeping with this, this case from Greenland is intentionally laid out differently to the others in the Handbook.

Who is I-energy?

Driven by a commitment to excellence, i-Energy was established in 2008 by its founder Abdulrahman Bader Khalifa Algosaibi, in the Eastern Province of the Kingdom of Saudi Arabia. Supporting the national oil and gas industry's sustainable growth in alignment with the Kingdom's Vision 2030 is i-Energy's primary goal.

What percentage of Greenland's energy comes from renewable resources?

However, times change and 55-60% of Greenland's energy in recent decades came from renewable resources. Greenland has five hydroelectric power plants and also uses heat from waste incineration plants operated by municipalities to provide heating in several of the towns in Greenland.

What kind of waste is in Greenland?

The first of these is waste, which includes household waste and cardboard boxes used in connection with the transport of food from outside Greenland. Waste material from the building industry is also included, as most houses in Greenland have concrete basement foundations, on top of which are wooden house structures.
