PLEASE NOTE: All of the certification and listing reports posted this web site are valid, although some have renewal dates that have passed. In the case of the latter, the reports are currently undergoing renewal as required by ICC-SRCC ...

ICC-SRCC launched the OG-500 certification program in 2024 to provide certifications for thermal energy storage equipment. It started with the certification of hot water storage tanks commonly used as components in solar thermal systems, commonly known as "solar tanks." These tanks may be certified to the ICC 903/SRCC 500 standard. Tanks may include the following [...]

OG-300 No. 2011095B | Solar Rating & Certification Corporation PARTS LIST: Part Quantity Evaluated Component Collector Option 1 2 Alternate Energy Technologies, LLC Model MSC-32 (OG-100 10001938) Solar Tank 1 American Water Heater Model SE62-119R-045S (450 L volume) IDENTIFICATION:

OG-500 certification provides one means of complying with the requirements in the ICC 900/SRCC 300 standard and OG-300 program for solar water heating systems that solar tanks be listed. And their standardized performance ratings provide the key performance values designers need to implement them successfully in many different types of indirect ...

Other Services ICC-SRCC offers several additional services to complement its certifications and listings. Performance modeling for solar waters under standard OG-300 rating conditions. OG-300 Modeling Expanded OG-300 performance ratings for additional locations and configurations. OG-300 Supplements Custom solar thermal system evaluations to confirm code compliance and ...

During inspections the inspector will confirm the compliance of the Quality Management System, check for changes to the design of the product, and verify program requirements (like product labeling). Quality: Inspectors will review the Quality Management System implementation for topics that include: Design: Inspectors will check to confirm that design control measures are ...

Directory of OG-400 Solar Pool Heater Certifications NOTICE: The OG-400 certification program has transitioned to listings to the ICC 902/PHTA 902/SRCC 400 standard. Please see the SRCC Listing Directory for all listings of solar pool heating systems to this standard.

Solar Water Heating Systems The ICC-SRCC OG-300 Solar Water Heating System Certification Program provides proof of compliance for solar water heating systems to the current ICC 901/SRCC 300 standard. This standard is widely referenced by building codes, standards and incentive programs throughout North America. U.S. Federal tax credits, EPA ENERGY ...

The listings assess compliance to the CAN/CSA F378 Solar Collectors and CAN/CSA F379 Packaged Solar Domestic Hot Water Systems, which are referenced in the National Building Code of Canada. Certification is provided in conjunction with ...

When manufacturers apply for a new ICC-SRCC certification, they provide basic information needed to get the process started. But once we get underway, we will need more detailed information about your product to confirm that it complies with standards and to generate performance ratings (if applicable).

The Solar Rating & Certification Corporation is the leading solar heating and cooling product certification program in North America, certifying to the requirements of International and Uniform Codes and Standards. Building America Solution Center is a resource of the U.S. Department of Energy's Building Technologies Office.

ICC-SRCC was created by a group of states, SEIA and the Federal Government in the 1980's to address the need for quality and performance certification for solar thermal collectors and systems. ICC-SRCC has been recognized as the preeminent organization for solar thermal certification and rating for decades.

OG-300 No. 30004224 | Solar Rating & Certification Corporation PARTS LIST: Part Quantity Evaluated
Component Collector Option 1 2 Sun Bandit, LLC. Model Omega (OG-100 10001952) Collector Option 2 2

Inspections Inspections of factory production facilities and quality management systems is a key part of most product certification programs accredited to ISO/IEC 17065. While laboratory testing provides information on specific product samples at one point in time, it does not address the performance of products manufactured in the future. Inspections assess the quality systems ...

ICC-SRCC offers listings for all major codes and standards applying to solar heating & cooling products in North America. ICC-SRCC listings make it easy for solar product manufacturers to demonstrate code compliance. The program is designed specifically for the solar industry, from the experts at ICC-SRCC who know the technology and the industry.

Ireland solar rating and certification corporation

Solar pool heaters are among the most common uses of solar thermal technology in North America. SRCC provides several program options to address the unique needs of these types of solar thermal products. OG-100 Solar Collector Certifications: All types of solar thermal collectors used in solar pool heaters can be certified under the OG-100 ...

Codes and Standards References The ICC/SRCC standards for solar heating and cooling equipment are referenced in many building codes. These codes require compliance with the standards, which can be shown using SRCC's various certifications. See below for some examples and more information. This list is not exhaustive, and many individual states that use ...

ICC-SRCC maintains compliance assessment marks for its accredited programs. Listees with current certifications and listings are authorized to display them on marketing materials, websites, and product labels. This webpage summarizes ICC-SRCC's marks and how they may be used. These requirements are also summarized in the Usage Guide for ICC-SRCC Marks. Certified ...

The ICC-SRCC OG-100 certification program includes evaluation and performance ratings for solar thermal collectors as established in the ICC-SRCC Rules for Solar Heating & Cooling Product Listing Reports

This service provides ICC-SRCC clients with a tool to obtain performance ratings for the manufacturer to evaluate the performance of new and existing solar heating & cooling products. Thermal performance ratings are provided using SRCC's proprietary computer models, using the same input conditions, localized weather data and thermal loads used for OG certification ...

The Solar Rating & Certification Corporation (ICC-SRCC(TM)) is the leading certifier and standard developer for solar heating & cooling products in North America. Our certifications are designed to help manufacturers comply with building code, regulatory, and incentive program requirements in the United States, Canada, Mexico and the Caribbean ...

ICC-SRCC launched the OG-500 certification program in 2024 to provide certifications for thermal energy storage equipment. It started with the certification of hot water storage tanks commonly used as components in solar thermal systems, commonly known as "solar tanks." These tanks may be certified to the ICC 903/SRCC 500 standard.

Thank you for your interest in the Solar Rating & Certification Corporation's certifications and listings for solar heating and cooling products! Whether you are a domestic manufacturer or an international company exporting to North America, ICC-SRCC makes the process of certifying your solar product easy. Here's a summary of the steps in the process - [...]

ICC-SRCC maintains and publishes the following ANSI-approved consensus standards with the International

Ireland solar rating and certification corporation

Code Council (ICC). They form the basis of the OG-100, OG-300 and OG-400 certification programs. The current editions of the standards were approved and released in December, 2020. Online versions of the standards are available for viewing or purchasing. ...
